Discover & Combine Data

Search and discover

Analyze and
customize

Scale from local to
global

Integrate with other
platforms

Community Development

Market information
and analysis

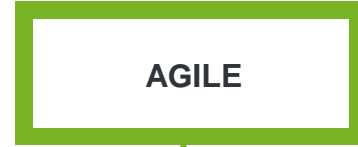

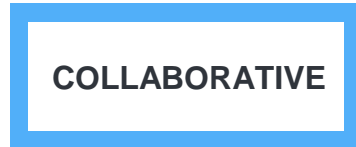

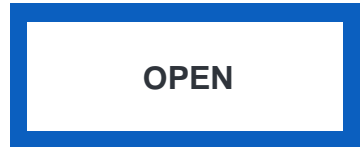

Use case & best
practice

Capacity building
and education

Marketplace
offerings

Discover both government and commercial imagery, and collaborate with tech-and non-technical users at the intersection of global development and remote sensing.

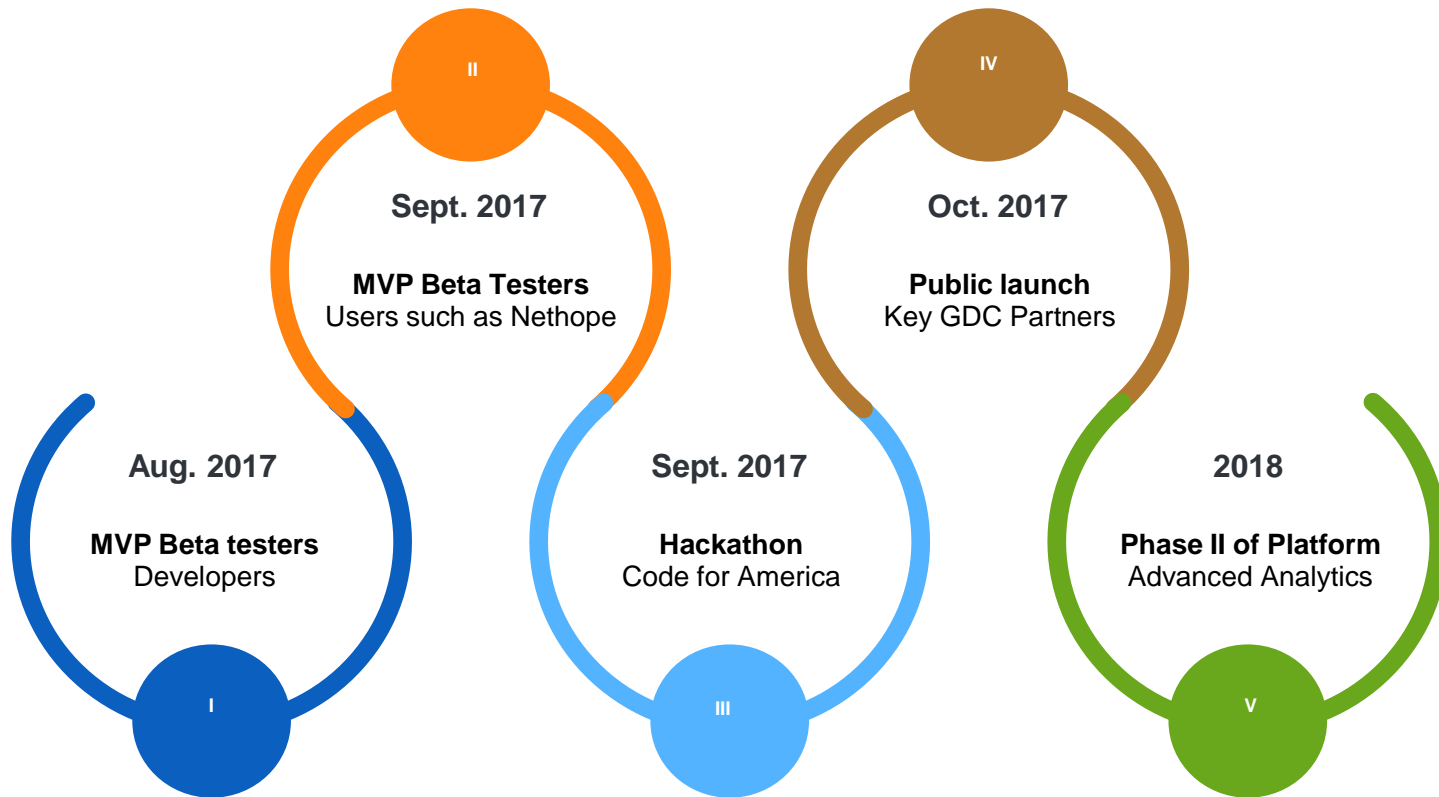

Find and work with diverse imagery data sets covering the globe with a federated catalogue.

Work with open imagery, data sets and technology standards

Learn and share ideas to improve collaboration across domains.

Experiment with data, visualization, and collaborate in a cross-domain multidisciplinary ecosystem.

GLOBAL DEVELOPMENT COMMUNITY

Customer benefits: First step to identify data available for development projects and support for geospatial analytics. Market visibility, community collaboration and education

COMMERCIAL BUSINESSES & ENTREPRENEURS

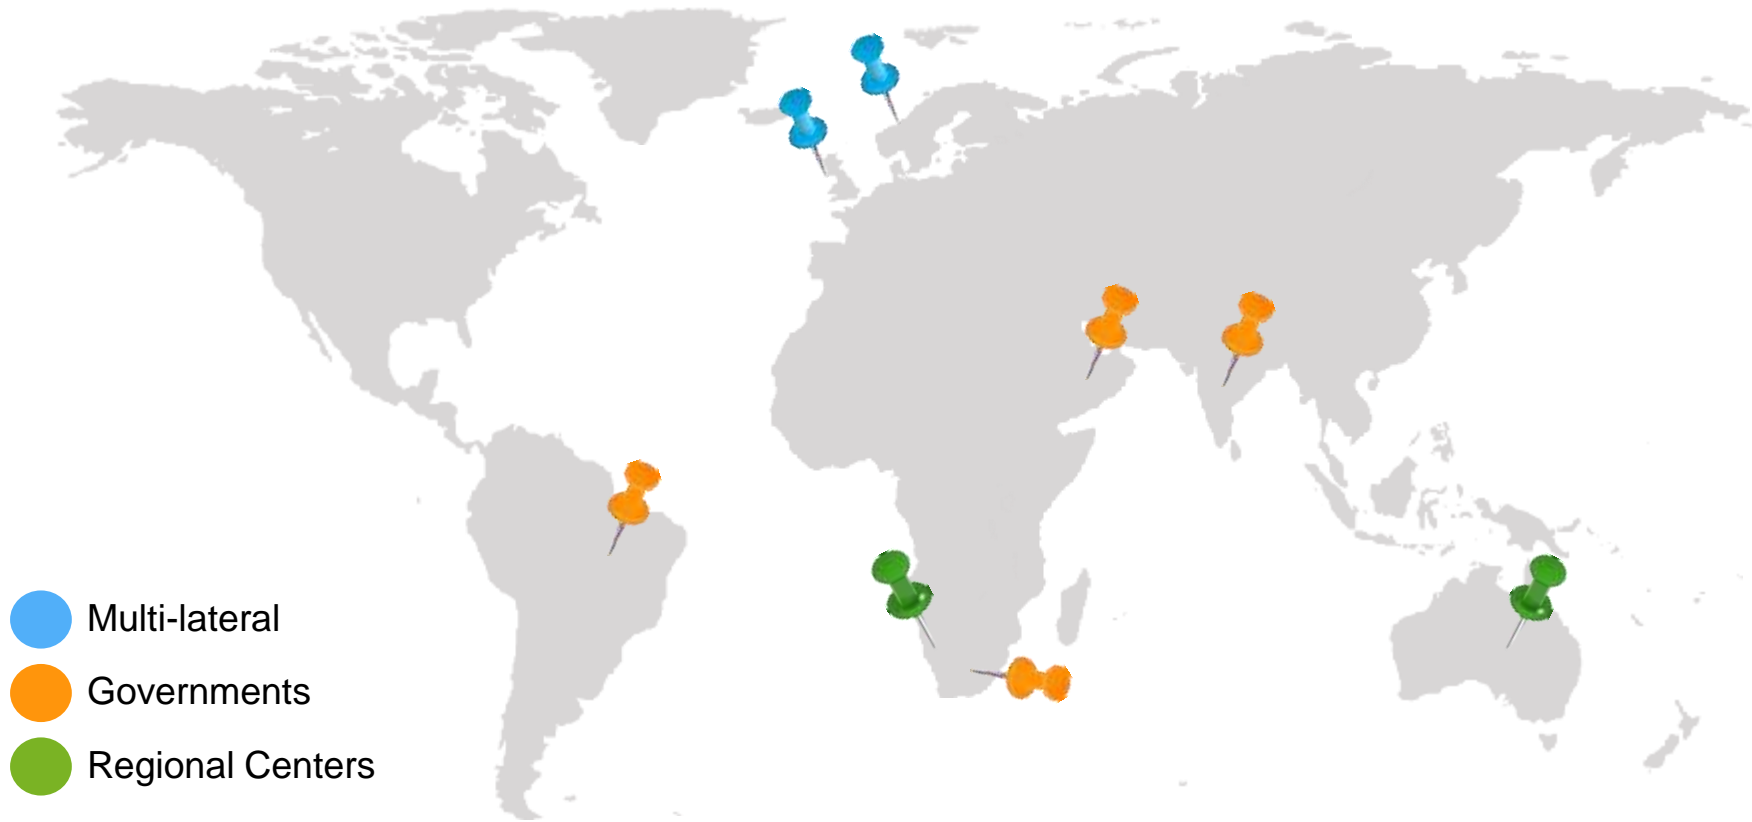

Customer benefits: Open data to support commercial applications at lower cost and higher reliability and availability; revenue sharing agreements to be established

GOVERNMENTS & UNIVERSITIES

Customer benefits: Open and reliable access to global data supporting governance, academics, science, research, transparency and new entrepreneurial pursuits

- Multi-lateral
- Governments
- Regional Centers
